SWIMMING IS ART. THIS IS THE PALETTE.

THE CATALYST.

is the state-of-the-art
in training paddle design.

Unlike other over-sized
paddles, the Catalyst improves
all strokes while minimizing
the risk of injury. So you can
keep swimming. And winning.
And creating waves of
your own.

1 The Catalyst's
extended wing,
lateral edge design
promotes correct
entry, extension,
pull-through and
recovery phases of
your stroke. It's a
natural extension of
your hand, creating
lift and increasing
resistance.

2 A smaller surface
area on its inside
edge reduces pressure
on the biceps tendon
and supraspinatus
muscle of the rotator
cuff during the pull-
through phase of a
freestyle stroke.

The holes along this edge
minimize resistance and
help reduce the shoulder
stress which can result
from training with over-
sized paddles.

A unique offset strap design
improves stroke technique by
preventing improper paddle
rotation and allows a more
comfortable fit.

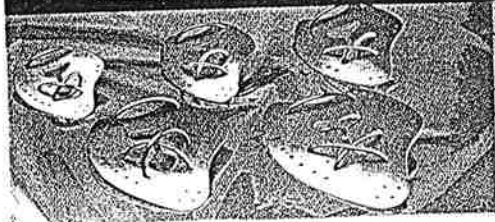

The flow hole in
the palm area gives
you a better feel for
the water, which is
essential for improving
stroke technique.

The Catalyst is con-
structed of durable,
UV-protected poly-
propylene, injection-
molded for a smooth,
pliable shape without
sharp edges.
